

# RAEEM TALUKDER

## SOFTWARE ENGINEER

developing next generation cybersecurity strategy security technologies and are effective in collaborating and communicating across the team.

## WORK EXPERIENCE

**CUSTOMER SERVICE REPRESENTATIVE** Contacted customers and vendors to initiate and complete supply/repair contracts and resolve logistic issues.

Six Flags  
2021-2022

**CUSTOMER SERVICE REPRESENTATIVE** Address customer inquiries, process orders, update shipment status, and manage fulfillment timelines.

Target  
2022-Present

## EDUCATION

**CALIFORNIA STATE UNIVERSITY NORTHRIDGE**

B.S. Computer Science  
2024-Present

Relevant Coursework:

Automata, Languages, and Computation

Database Systems

Web Development

Operating Systems and System Architecture

Computer Networks and Security

Algorithm Design and Analysis

Operating Systems

Web Design and Development

Computer System Security

**COLLEGE OF THE CANYONS**

Transfer Coursework  
2021-2024

Data Structures and Algorithms

Object-Oriented Programming

Computer Architecture and Assembly

Discrete Structures

Advanced Data Structures

**SYLMAR MISSION COLLEGE**

Mathematics Coursework  
2023-2024

Linear Algebra

Calculus III

## EXTRACURRICULARS

**MARVEL RIVALS TEAM CAPTAIN** Competed in the Collegiate Rivals Series, a competitive gaming league for college students.

Participated in multiple tournaments and events, achieving placements in several competitions.

Esports Team Coordinated team strategy, communication, and player development during competitive matches.

2025-Present

**LAYERS 8**

Cybersecurity Club  
2025-Present

Active member of the Layers 8 Cybersecurity Club.

Participated in hands-on labs designed to strengthen cybersecurity and system defense skills.

Practiced identifying and responding to simulated cyber attacks and security vulnerabilities.

Collaborated with peers in a technical learning environment focused on cybersecurity growth.

**PROGRAMMING LANGUAGES:**

Java, C++, JavaScript, HTML/CSS

## PROJECTS

**DIVIDE AND CONQUER PROJECT - APRIL 2025**

Implemented an application where the program will find any number in a 2 dimensional array.

Utilized the Divide and Conquer algorithm to constantly split the array until the number is found.

**DYNAMIC PROGRAMMING PROJECT - MAY 2025**

Designed an application where the program will find the longest path in a 2-D array.

Constructed a Dynamic Programming algorithm to be used to store previous number to determine the longest path in the array.

**DOMINION BANK - DECEMBER 2025**

Designed a mock ATM Machine.

Constructed a mock ATM Machine with use of Java and Java fx. Implemented a withdrawal, deposit, view balance, login, and admin control.

**MARVEL RIVALS SCOUT TRACKER - DECEMBER 2025 (IN PROGRESS)**

Be able to collect data from the Collegiate Rivals Series and be able to output a scouting cheat sheet.

**PUFFLE PET GAME - APRIL 2026**

Designed a Puffle Pet Game.

Constructed a Puffle Pet Game with use of html, css, and javascript. Implemented a pet game where the user can feed, play, and walk their pet.

**MARVEL RIVALS DATA TRACKER - DECEMBER 2025 (IN PROGRESS)**

Implement a database to collect information on team statistics, player statistics, as well as map differential. Then use arithmetic principles to create a data spreadsheet to help competitors scout competition

**PROJECT Z - JULY 2025 (IN PROGRESS)**

A RPG Rogue-Like where the player goes through a turn based combat to make it through multiple levels .

Implements different mechanics like healing, buff/debuff, level up system, and player progression stats.

**DND CHARACTER CREATOR - DECEMBER 2025(IN PROGRESS)**

Designed a Dnd Character Creator.

Constructed a Dnd Character Creator with use of html, css, and javascript. Implemented a character creator that allows users to create a character with different attributes and classes.

To be able to ease the process of creating a character for Dnd and to be able to have a more efficient way of creating a character.

I never quite realized... how beautiful this world is.
